# Online Conveniences From Local Developers

[www.personalpropertypro.com](http://www.personalpropertypro.com)

Tired of manually preparing Form 901? Check out **Personal Property Pro**. TorqueWare, Inc. developed this software locally in Tulsa, Okla. This software gives CPAs a tool to quickly prepare professional looking property renditions that were previously prepared by hand.

Highlights Include:

- Laser printed forms accepted by all 77 Oklahoma counties;
- Unlimited number of asset entries per property (except Lite version, which allows 100 assets);
- All client, property and asset information carries over from year to year (Update only modified asset or client information each year to reflect changes);
- Fully customizable transmittal letters on plain paper or letterhead; and
- The Print Preview Feature allows you to review the return on screen.

System Requirements:

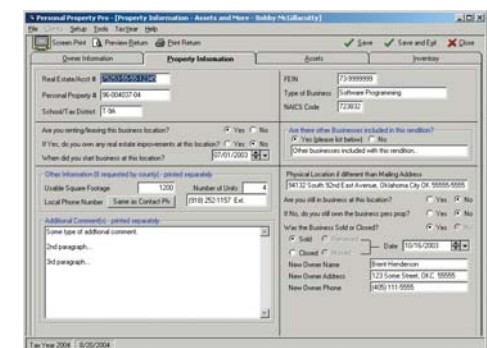

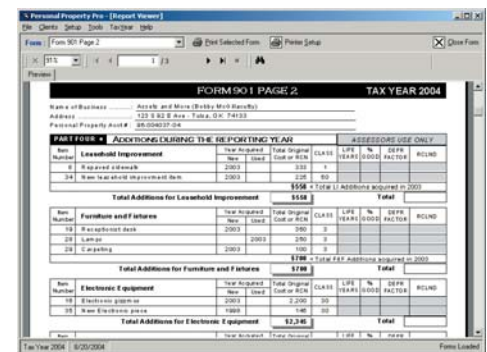

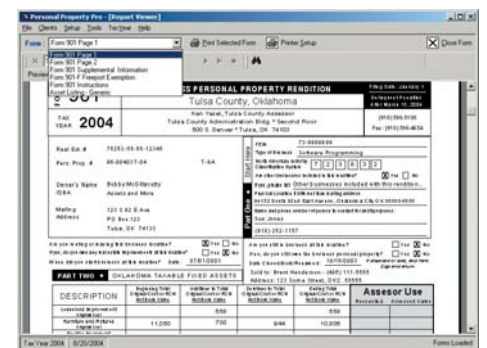

- Windows XP, WinNT or Win2000 operating systems. Do not install this on Win95 or Win98 machines;
- 500 MHZ

Processor (1.0 GHZ or higher recommended);

- 128 Megabytes of memory (256 Meg or higher recommended);
- 25 Megabytes of hard-drive space; and
- Internet connection to register the product if you decide to purchase a license.

The software offers a free downloadable. The download is more than 13MB, so if you are running on anything less than broadband you will want to allow some extra download time.

The user interface is easy to navigate and allows you to drill down to the underlying assets for additions and deletions.

*This software gives CPAs a tool to quickly prepare professional looking property renditions that were previously prepared by hand.*
